

House price analysis for Athens

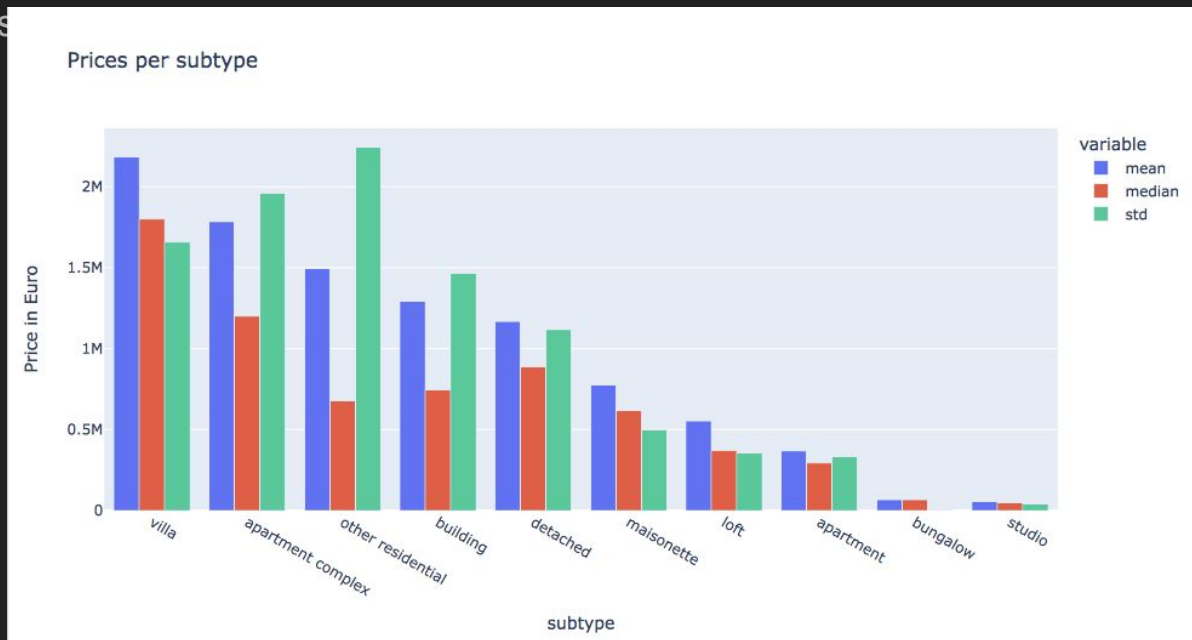

Listing prices per area

Northern suburbs tend to have the highest listing prices followed by south beach. As expected listings in beesy neighborhoods have the lowest.

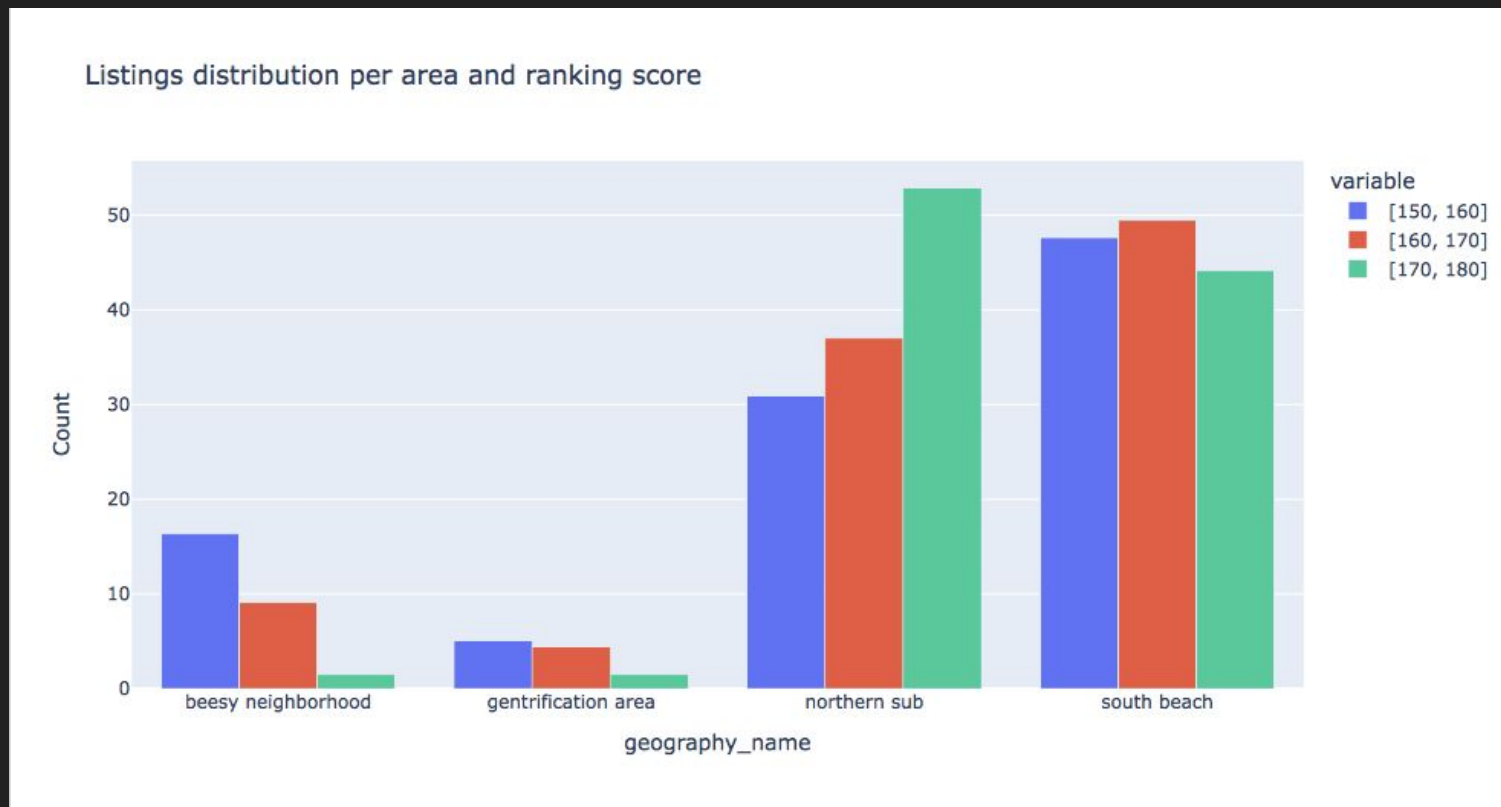

Listing prices per type

Villas and apartment complexes have the highest prices while studios and bungalows are the most inexpensive.

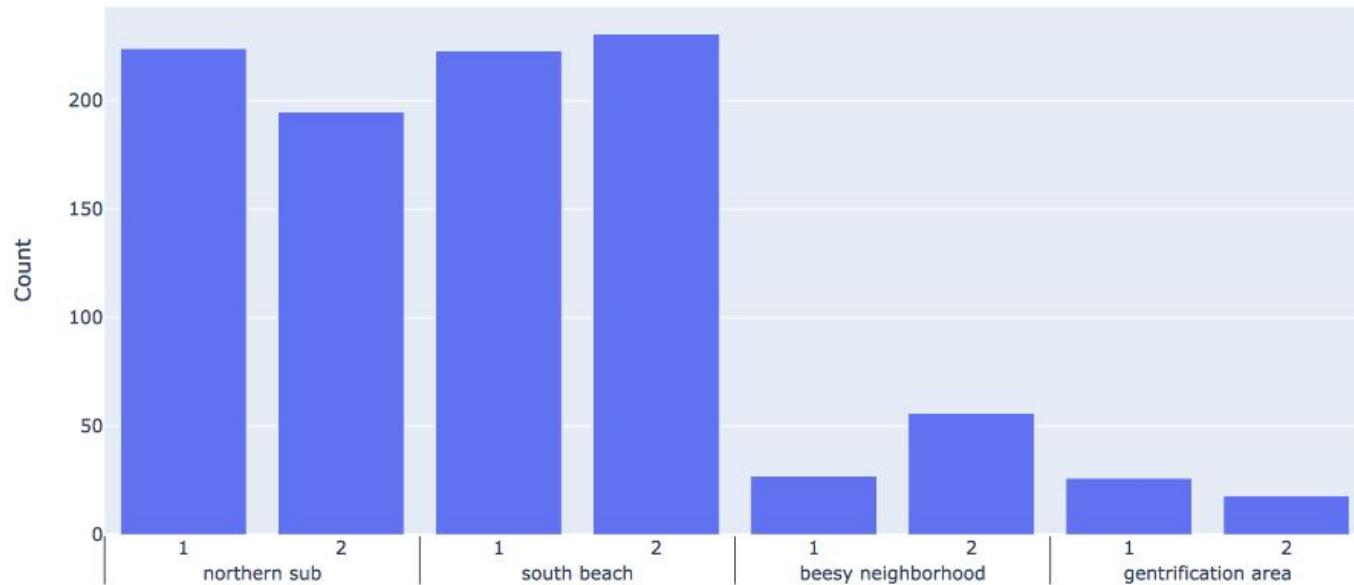

Competitiveness metrics

Competitiveness metrics

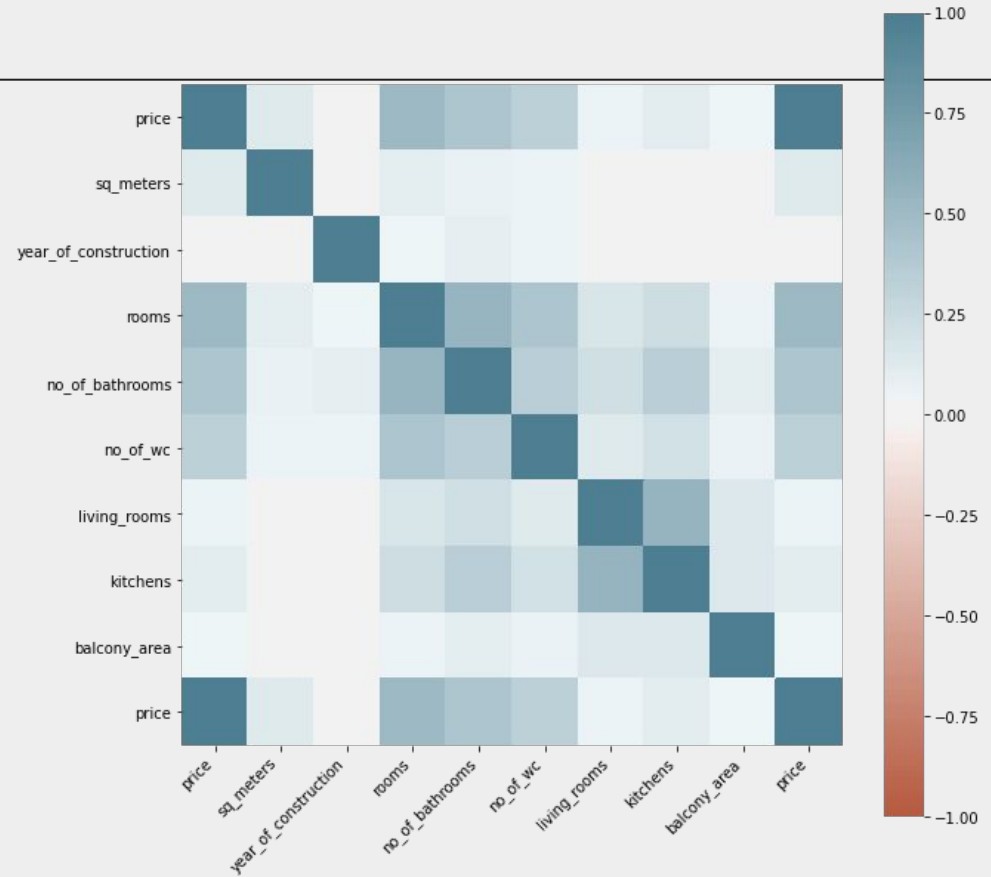

Listings distribution per area for every 500 of results order by ranking score

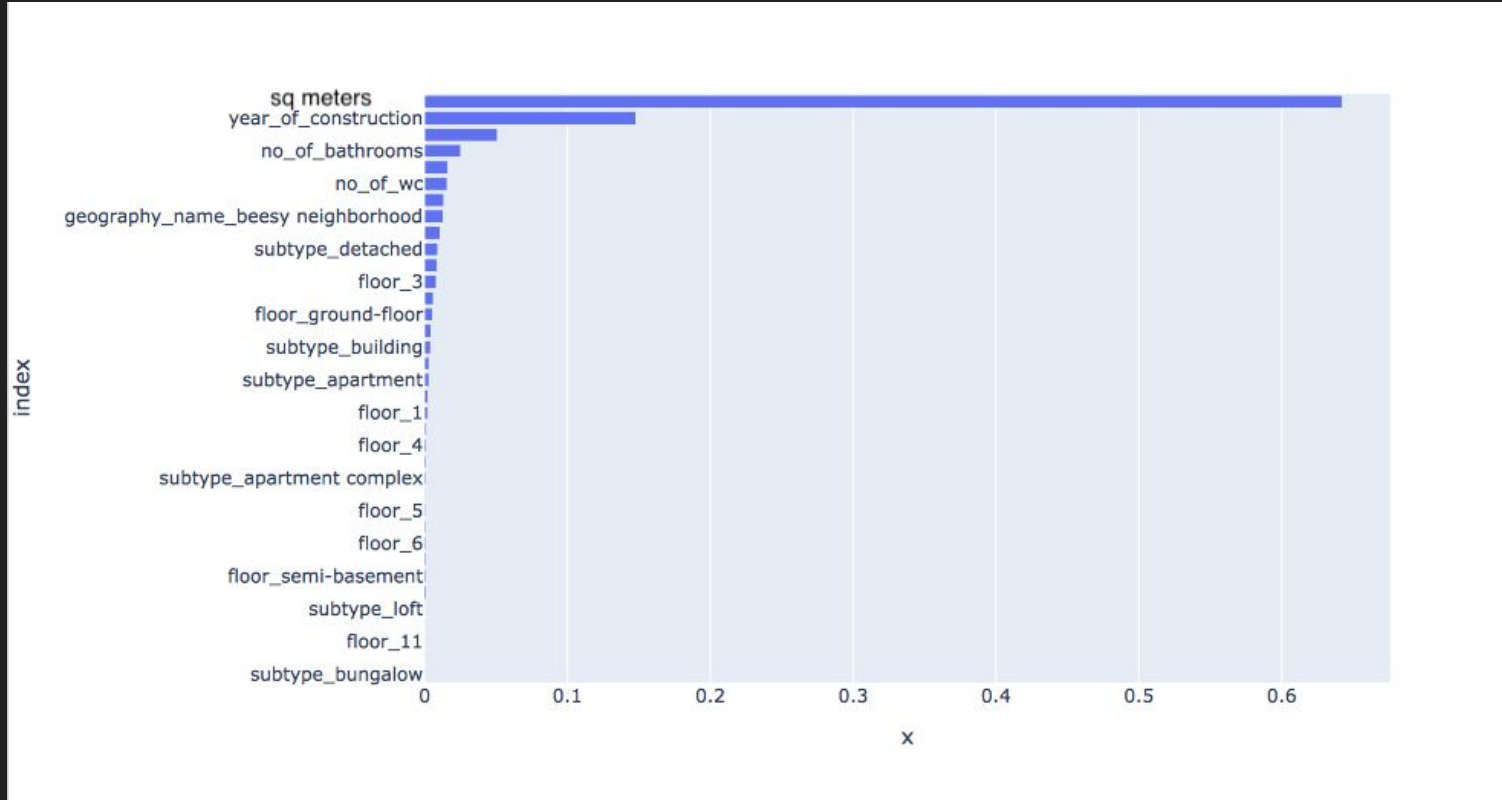

Feature importance

Correlation matrix

As we see from the correlation matrix the rooms, the number of bathrooms and the number of WCs have the higher correlation with price. The square meters of the listing seem to be less correlated.
